
Reconstructions E- and G-net

Project

Reconstructions in the E- and G-net. This was the responsibility of ImProvia within the department "Reconstructions and Nets" (R&N).

Important competences

Mechanical engineering, Electrical engineering, Civil engineering, Project management.

Responsibilities ImProvia

ImProvia was responsible for the region Texel and the Kop van Noord-Holland concerning:

- communication with customers;
- intake of the cases with the customers;
- distribution of the Work Package;
- budget.

Due to area developments of the customers it is often necessary to divert the net and to renew it at the same time. ImProvia has done different work performances like:

- reconstruction of the N241 (diversion of 10 km high-pressure gas line and 10 kV power cables);
- establishing a connection of a totally new Gas and Electricity net at Julianadorp for the benefit of 6 apartment complexes;
- replacement and moving a 10 kV under station including cabling because of the realisation of a new library in Den Helder.
